## CitiFX Prime expands capabilities

CitiFX Prime's post-trade reporting and portfolio management tool, CitiFX Click, has a number of new features. Its' Allocations functionality has been released and clients now have a very flexible, intuitive means of automatically allocating and rolling trades as they arrive. Targeted at option users, its' Analytics functionality uses Click's intuitive dynamic filtering and delivers an array of pricing and risk-management measures with a high degree of flexibility around parameter-setting and market data.

Real-time margining has always been available in Click, but recently Citi added the monitoring of NOP and DSL limits in real time with alert functionality for all credit events. CitiFX MD and Head of FX Prime Brokerage Andrew Coyne says: "Citi is committed to creating value for its clients through continual investment in client-facing technology."
